MIUNN

Karri Monni | 2011 | Outdoor

When minimalism embraces. It involves technology and the 3D processing of a wood sheet. It involves a hand that designs, thinking of itself, of the palm that holds water and sand. The result is the sinuous MIUNN, with its embracing seat and perfect support for the back. In the chair and stool version it adapts easily to any environment. Peacefully, just as it was designed.

SEDIA BASE 4 GAMBE

Like a hand holding water

How does a perfect design originate, that sinuous line that supports and protects? It arises from observing the human body and the environment in which it moves. It is created by following the palm that holds river water and sand from a pure white beach. MIUNN, made of stainless steel and with a Baydur shell, is the hand that captures the beauty of nature. And like nature, this chair, also in a stool version, surprises us and gives us the energy of eternal spring.
