KILI

Mario Ferrarini | 2026

From a reflection on an ancient gesture such as turning comes KILI, the collection of tables and side tables designed by Mario Ferrarini. Applied to a sheet rather than a solid volume, the process creates a soft, continuous conical base that combines sculptural presence, stability and visual lightness. The profile recalls the shape of a volcanic crater, the inspiration behind the name. The spun sheet metal base is paired with a screw-fixed extruded aluminium column, designed to facilitate assembly, disassembly and part replacement, contributing to a more responsible product life cycle. Available in different sizes, heights and tabletop shapes, including a double-column version, KILI fits naturally into contract and HORECA spaces, expressing a measured, harmonious and durable design.

Istruzioni di uso e manutenzione

Clean all parts in wood, leather, fabric and metal with a damp cloth or a diluted neutral cleaner. Do not use cleaners with alcohol, bleach, solvent or abrasive products. Any liquid spilt on the product must be wiped up immediately.

When lifting or moving the product, hold it on the structure and not under the seat. The product should not be subjected to unbalanced weights, as it is designed for a proper rest on the foothold (on four legs or on the base).

Avoid any improper use of the product: do not step on the product, on the footrest or on the armrests. Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 40°C. Also products for outdoor use could be afflicted by atmospheric agents.

An appropriate and frequent maintenance and cleaning of the product enhances its durability. The product could change colour and shade, if exposed to direct sunlight. Once the product has been dismantled, the product itself or its components must be given to the public garbage disposal system, according to the legislation in force.
