SEELA AC

Antti Kotilainen | 2018, 2022, 2026

The SEELA seating family by Antti Kotilainen grows and adds two new proposals in 2025, both suitable for indoor use and the contract and residential markets: a SOFT variant with an upholstered cushion applied to the inner shell and a version with an inner shell covering in black leather. The new proposals join the existing ones, characterized by very light bases on which rests a sinuous polypropylene shell, which in turn continues into the seat without interruptions, accommodating a rounded insert in wood, polypropylene or fabric. Also available in the fully upholstered variant, even more comfortable and elegant, it allows you to play with colors, having fun combining a shell in one color and the seat interior in another.

Istruzioni di uso e manutenzione

Clean all parts in wood, leather, fabric and metal with a damp cloth or a diluted neutral cleaner. Do not use cleaners with alcohol, bleach, solvent or abrasive products. Any liquid spilt on the product must be wiped up immediately.

When lifting or moving the product, hold it on the structure and not under the seat. The product should not be subjected to unbalanced weights, as it is designed for a proper rest on the foothold (on four legs or on the base).

Avoid any improper use of the product: do not step on the product, on the footrest or on the armrests. Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 40°C. Also products for outdoor use could be afflicted by atmospheric agents.

An appropriate and frequent maintenance and cleaning of the product enhances its durability. The product could change colour and shade, if exposed to direct sunlight. Once the product has been dismantled, the product itself or its components must be given to the public garbage disposal system, according to the legislation in force.
